

# peg + cat + us

## Math is Everywhere!

When you ask your child to add one more or take one away, you are helping your child learn important math skills. Start by just adding one more. You can ask, "How many crackers do you have? Here's one more. How many now?" When your child eats one, ask, "How many now?" That helps your child learn to work with numbers.

Peg has 3 flowers.

She wants 5 flowers.

Draw 1 more flower.

How many does she have now?

Now draw 1 more flower.

How many flowers now?
